

LRES3019PF-OCP

—OCP3.0 Quad-port Gigabit Copper Ethernet Network Adapter (Net-swift WX1860)

Overview

LRES3019PT-OCP is a OCP3.0 SFF Quad-port copper gigabit ethernet network adapter developed by Shenzhen Lianrui Electronics Co., Ltd. based on Net-swift. The adapter card achieves a four-port bidirectional communication transfer rate with a theoretical throughput of 8G on a PCI Express v2.1 x4 bus.

The ethernet network card (LRES3019PT-OCP) with Net-swift 's independent intellectual property rights launched by Shenzhen Lianrui Electronics Co., Ltd. has a fully integrated gigabit ethernet media access control (MAC) module. It is widely used in network communication, and can also be used on servers, embedded and so on.

The main controller used by Net-swift's independent intellectual property rights and independent controllability, which is of great significance for breaking the monopoly of certain enterprises and ensuring information security.

The controller used by LRES3019PT-OCP is autonomous and controllable. The indicators including data transmission, data network bandwidth, average transmission delay, and actual small packet transmission rate have reached the industry level.
