

HX141(1-PACK)

TP-Link

TP-LINK HX141(1-PACK) Maximum wireless signal speeds are the physical speeds derived from the IEEE 802.11 standard specifications. Actual wireless data throughput and wireless coverage, as well as the number of connected devices, are not guaranteed and will vary as a result of network conditions, customer limitations, and environmental factors, including construction materials, obstacles , traffic volume and density, and client location.*Use of WiFi 6 (802.11ax) and features including OFDMA, 1024-QAM, TWT, WPA3, and MU-MIMO require clients to also support the corresponding features .** Mesh network requires two or more devices. This product supports standardized EasyMesh technology but has not obtained Wi-Fi EasyMesh TM certification. Seamless Roaming/No Drop WiFi refers to WiFi roaming that supports IEEE 802.11 k/v/r protocols, which helps connected devices to search and switch from one AP to another in 0.3 seconds. Clients must support 802.11 k/v/r and may require additional configuration. Performance may vary depending on client device. Actual network speed may be limited by the speed of the product's WAN or LAN Ethernet port, the speed supported by the network cable, Internet service provider factors, and other environmental conditions. .

Specifications

Wi-Fi band	2.4GHz/5GHz
Wi-Fi Standard	Wi-Fi 6 AX1500 1201 Mbps (5 GHz) + 300 Mbps (2.4 GHz).†
kind of product	Router and AP, EasyMesh Controller or Agent.
Product color	WHITE
